

loranto[®]
Handmade artistic glass

FUSION is the new product line combining two contrasting elements: heat and cold, fragility and durability, as well as glass and metal. The materials incorporated in our compositions differ when used separately, but united, they add up to a coherent whole. This fusion gives our product a unique appearance. The projects are inspired by nature and endowed with diversified shapes, rigid structures and distinguished shades of colors, which enable every interior to gain innovative character.
